

LOKMAN BATURAY EFE

Fullstack Engineer

[E-Mail](#) • [Portfolio](#) • [LinkedIn](#) • [GitHub](#)

Summary

Fullstack Engineer experienced in developing production-grade web and SaaS products end to end, with ownership across frontend, backend, and system integrations in fast-moving environments.

Experience

Beefair

Remote

Founding Engineer (Next.js, React Native, TypeScript)

Dec. 2025 – Present

- Built and launched the web app from scratch in Next.js, owning the frontend end-to-end from initial implementation to production release.
- Maintain the React Native mobile app: bug triage, fixes, and release stabilization across ongoing feature work.
- Owned production rollout: coordinated releases, resolved launch-blocking issues, and aligned web and mobile flows.

VoiceDrop

Remote

Fullstack Engineer (Next.js, Python, TypeScript)

Nov. 2025 – Jan. 2026

- Built and optimized Stripe billing flows: trial pages, cancellations, upgrade/downgrade, and new pricing plan implementation.
- Fixed revenue-critical UI/UX and frontend-backend issues through rapid iteration QA and production debugging.
- Built internal Python automation for cold email outreach: generated lead lists and personalized sequences to support sales ops.

CompanyDNA

Remote

Backend Engineer (Node.js, GraphQL, AWS)

Apr. 2024 – Sep. 2025

- Built backend services and integrations for Slack-based workflows and internal automations, focusing on reliability and clean API design.
- Integrated 30+ third-party systems and tools, handling auth, data sync, and event-driven workflows.

Cosmos

Edirne, Turkey

AI Engineer (Python, OpenCV, YOLO, Linux)

Dec. 2023 – Jun. 2024

- Developed ML APIs and computer-vision pipelines, including large-scale dataset processing and OCR model optimization.

Education

Trakya University, Bachelor's Degree, Computer Engineering, 2022 – Present (GPA: 3.42/4.0)

- **IEEE, GDG On Campus:** Organized [hands-on AI](#) and [computer vision](#) workshops.
- **Events:** Supported the organizing teams for **DevFest Edirne (2024, 2025)** and [GameJam 2077](#).

Projects

- [GDG On Campus TU Website](#) – Official student developer community website (Next.js 14, Firebase): 2,000+ visitors in 3 days; hosted a quiz game with 200+ concurrent users.
- [SaaS Kit](#) – SaaS boilerplate (Next.js, Prisma, Paddle) with a clean starter structure for product flows.
- [Chimera](#) – AI chat application (Golang, React, OpenRouter) with multi-provider chat routing.

Skills

- **Programming Languages:** JavaScript, Python, TypeScript, Golang
- **Frameworks & Libraries:** React, Next.js, Node.js, Express, FastAPI, React Native
- **Databases & Cloud Platforms:** MySQL, PostgreSQL, MongoDB, Redis, AWS, Firebase
- **AI/ML:** LLM tooling, RAG, WebAI, Computer Vision (OpenCV/YOLO)
